

AIT STARTUP INCUBATION PROGRAM 2022

The AIT Startup Incubation Program is the third phase of the SDG Open Hack Bangkok project, an Institute-wide collaborative initiative by the Asian Institute of Technology (AIT) with the United Nations Institute for Training and Research (UNITAR) and its partners, the University of Geneva, and Open Geneva. The four winning teams from the SDG Open Hack will undergo a five-day intensive incubation program at the AIT Entrepreneurship Center to be trained to further improve the clarity of their ideas and solutions ready for real-world applications through the development of the prototypes or MVP (Minimum Viable Product) using the available resources provided by AIT.
